TECHPEOPLE USA

Azure Data Architect / Solutions Architect

Description

- Location: **Bartlesville, OK**
- # of Positions: **1**
- Eligibility: **Open**
- Client Name / Domain: **Fortune 1000**

- Bill Rate: **$?? per hour**
- Employment Mode: **Contract / Corp-to-Corp**
- Contract Duration: **12-24+ mos. Contract**
- Experience: **15+ years**
- Skills: ARB1, ITMS, Azure, CDM, ADLS, Azure Data Factory, Azure Synapse Analytics

Client is looking for a **Azure Data Architect** with high level of expertise in solution architecture, business analysis, and IT management. The primary responsibilities include collaborating with cross-functional teams to design, plan, and execute advanced solutions, with a focus on creating high-level System Architecture (ARB1), drafting ITMS documents, and utilizing senior resources effectively. The alignment/integration of 2 different data model/product approaches into one… would help show the area of experience we're looking for is very much in the data area, not analytics, UI, etc.

Responsibilities

- **High-Level Solution Architecture:** Develop and maintain high-level solution architecture that aligns with business goals and objectives.
- Provide strategic guidance on technology and application choices.
- Architecture pack for ARB1, sufficiently detailed plan/costs to go into PIP.
- **Business Analysis:** Conduct in-depth business analysis to understand and define the requirements of various stakeholders. Translate business needs into technical solutions that drive business success.
- **ARB1 and ITMS Documentation:** Draft and maintain ARB1 documentation and ITMS documents to ensure a clear understanding of architectural decisions and implementation strategies.
- **Senior Resources Management:** Collaborate with senior resources and lead technical teams effectively. Provide mentorship and guidance to junior team members, fostering a collaborative and innovative work environment.
- **Design and Planning:** Lead the design and planning of complex technical solutions. Ensure that solutions are scalable, secure, and aligned with industry best practices.
- **Common Data Model**: Work on projects involving the Common Data Model (CDM) to ensure consistent and standardized data across the organization. Implement data models that facilitate seamless integration and reporting.
- **Technical Solution Support:** Collaborate with cross-functional teams to help with the selection and implementation of appropriate technology solutions. Provide expertise in evaluating and adopting new technologies
- Leverage Azure services such as Azure Data Lake Storage, Azure SQL Database, Azure Data factory, Azure Synapse Analytics and other Azure components to build end-to-end data solutions.
