### Description

- Location: **Cincinnati, OH**
- # of Positions: **1**
- Eligibility: **Open**
- Client Name / Domain: **O&G**
- Bill Rate: **\$\$\$ per hour**
- Employment Mode: **Contract / Corp-to-Corp**
- Contract Duration: **12+ mos. Contract**
- Experience: **12+ years**
- Skills: **SAP S/4HANA, SAP Analytics Cloud, ETL, SQL, MDX, DataSphere**

**The Ask?** Client is looking for an experienced **SAP SAC Consultant / Lead** responsible for the day-to-day support of technical operations and collaborating, guiding, and assisting in the delivery of new functionality in SAP Analytics Cloud space of ERP Services, V&C area specific to business processes supporting Planning, Forecasting and Reporting. This includes working closely with key business partners, third party vendors and aligning key processes across the organization to accomplish strategic direction.

### Responsibilities

Working as part of the global SAP team. As a SAC Lead, you will be responsible for understanding, guiding, and supporting the business area and helping shape their future using SAC technology and associated integrations with SAP S/4Hana aligned to the financial strategy for Data.

- Support, troubleshooting, problem solving SAC technical issues on a day-to-day operational basis.
- Understand SAC upgrades and updates, this includes assessing the impact to Lilly's use of SAC, coordinating regression testing, and ensuring that customizations and configurations are not impacted.
- Support the development of evolving global design in Planning, Forecasting and Reporting (PFR) as it relates to SAC functionality.
- Partner with IT Business Process Architects and Business Partners to support future state business processes and technologies to accomplish short, and long-term business goals.
- Work with key business partners and other IT business process consultants to identify business problems and evolve the global solution, using SAC to meet the business needs most effectively.
- Work with business process owners, other functional Business Integrators, as well as Enterprise Architecture groups on cross functional issues. Act as a liaison between IT and business partners on projects.
